

MAINTENANCE AND SAFETY RULES

hushspot HSW-SW-001 / HSW-SW-002

1 FELT ELEMENTS

In felt elements, localised surface friction should be avoided due to the possibility of pilling and crumpling.

Vacuum the felt elements once a week.

2 TABLE TOP AND FLAT SURFACES

Once a week, clean the surface from top to bottom with a damp microfibre cloth that does not leave fibres and prevent streaks. If any liquid is spilled on the furniture, wipe it immediately before it dries. Do not use products containing abrasive agents, such as powders, pastes and cream cleaners which can scratch the surface. Do not use rough sponges.

3 METAL COMPONENTS

Once a week, clean the surface from top to bottom with a damp microfibre cloth that does not leave fibres and prevent streaks. Do not use preparations containing solvents or abrasives, such as cleaning powders, pastes or milks, which may scratch the surface. Do not use rough sponges.

Do a test on a barely visible surface before application.

4 PLASTIC COMPONENTS

Once a week, clean the surface from top to bottom with a damp microfibre cloth. The use of solvent-based products may damage the surface. Do not use products containing abrasive agents, such as powders, pastes and cream cleaners which can scratch the surface. Do not use rough sponges.

* Product visualisation is for reference only. Variations are allowed depending on the version of the product available in a given market.

MAINTENANCE AND SAFETY RULES

hushspot HSW-SW-001 / HSW-SW-002

This appliance can be used by children aged from 8 years of age and persons with reduced physical or mental capabilities. Children must not play with the appliance or clean it or carry out maintenance. The booth can be used by persons with no experience and knowledge of the appliance if they have been given supervision or instruction concerning the safe use of the appliance so they understand the potential hazards related to such use.

FELT ELEMENTS

In felt elements, it is important to avoid strong localized pressing at one point, otherwise there is a risk of the felt splitting, tearing or denting.

METAL FRAME

The metal frame must be levelled in accordance with the assembly instructions to avoid damaging the table structure. Height adjustment range of levelling feet +/- 10 mm.

NUMBER OF USERS

Do not exceed the recommended maximum number of users as specified below.

Maximum number of users:

HushSpot –  x 4-8 users depending on the product version.

MOVING THE TABLE

The table can only be moved once it has been disassembled and reassembled elsewhere.

INTENDED USE OF THE TABLE

Hushoffice furniture should be used for purposes for which they are intended and for which they have been designed. Our products have to be used indoors in dry places

In particular, the following should be avoided:

-  prolonged exposure to temperatures **below 15°C and above 40°C**;
-  temporary temperatures **above 60°C**;
-  exposure to **water** and air **humidity above 70%**;
-  direct exposure to **sunlight**.

TABLE ASSEMBLY AND DISASSEMBLY

Please refer to the assembly instructions for the number of components and the correct assembly method. Table assembly and disassembly must be carried out in accordance with the instructions by a qualified installation team using the tools provided for this purpose.

USE

 Items with sharp edges or rough surfaces can scratch the tabletop, so the use of insulating pads is recommended (particularly for natural wood veneer and varnished furniture)

 Electrical and heat-emitting appliances should only be used when users are present in the booth. The electrical system should be used as specified in the provided instructions.

If you have any doubts about the use and maintenance of the furniture, please contact the manufacturer before carrying out any of the operations described in the instructions above.

PERMISSIBLE LOADS

 Do not exceed the recommended maximum loads in the booths as specified below. **Do not sit on the table!**

Maximum load of tabletop – **120 kg**

Maximum load for felt channel – **15 kg**

Maximum load for accessory organiser – **15 kg**

INFORMATION ABOUT THE WASTE ELECTRICAL AND ELECTRONIC EQUIPMENT COLLECTION SYSTEM

Return your waste electrical and electronic equipment to the place of purchase.

Take your waste equipment to a collection facility. Information about the nearest location can be found on the website or notice boards of local authorities. Collected equipment is delivered to specialised waste treatment facilities where hazardous components are removed first. Other components are recovered and recycled. Each appliance powered by electricity or batteries should be labelled with the crossed-out wheeled bin symbol.

The crossed-out wheeled bin symbol on the equipment, packaging or documents accompanying the equipment means that the product

must not be disposed of with other household waste. It is the user's responsibility to take the waste equipment to a designated collection facility for proper treatment. This symbol also means that the equipment was placed on the market after 13 August 2005.

Do not dispose of your waste equipment with other household waste! If you do, you may get a fine.

Proper handling of waste equipment prevents potential negative consequences for the environment and human health.

At the same time, we save natural resources by reusing raw materials obtained from recycling.

STANDARDS

Tested in accordance with EN 15372:2016 standard.

Type of application: general

Application: hotel, cafes, restaurants, public halls, banks, bars, meeting rooms.

Tested in accordance with EN 16121:2013 + A1:2017 standard.

Type of use: heavy

Use: military barracks, schools, universities.

POWER SUPPLY

Hushspot can be connected to a power supply which meets the power quality standards defined in the legislation in force. The manufacturer of Hush recommends that the socket supplying power to the booth is protected by a residual current circuit breaker (30 mA) and a type B miniature circuit breaker (max. 16 A). Once the Hush booth is installed, connect it to a 110 V or 230 V single-phase AC source using the provided single-phase plug and check the lighting and socket operation. Do not exceed the maximum single-phase socket load power of 800 W. During the warranty period, it is forbidden to tamper with the electrical system. Any repairs or modifications to the electrical system should be made by a qualified person.

If a non-detachable power cable is damaged, it should be replaced by the manufacturer, a service technician or a qualified person in order to avoid any risk.

Power consumption on stand-by mode 0,3 W.
